EDUCATION AND CERTIFICATIONS

University of Arizona

Bachelor of Science in Computer Science, Cloud Computing Concentration

February 2024 – Present

GPA: 3.4

Edmonds College

Associate Degree

August 2022 – May 2024

Microsoft Azure Fundamentals (AZ-900) | AWS Certified Cloud Practitioner (AWS CCP)

AWS Certified DevOps Engineer, Professional (In Progress)

PROFESSIONAL EXPERIENCE

Guidepost Montessori

Remote, USA

Systems Administrator / Systems Engineer

April 2024 – Present

- Administered Microsoft 365 tenants including Exchange Online, SharePoint, Teams, and OneDrive for 300+ users across multiple locations, managing licenses, compliance policies, and endpoint security.
- Deployed Azure Entra ID Conditional Access, MFA, Identity Protection, and PIM to enforce Zero Trust access controls across the remote workforce, reducing unauthorized access risks.
- Managed Microsoft Intune MDM for device enrollment, compliance policies, and app deployment across Windows, macOS, and iOS endpoints, and administered Jamf for macOS device management.
- Automated onboarding and offboarding workflows using PowerShell and Azure CLI, reducing provisioning time by 60% and ensuring consistent, repeatable processes across all environments.
- Administered Active Directory, GPOs, OU structure, group-based licensing, and hybrid identity sync via Azure AD Connect across distributed environments.
- Built and maintained CI/CD pipelines using Azure DevOps and YAML, automating build, test, and deployment workflows across DEV, QA, and production environments.
- Developed ARM Templates and Terraform modules to provision and manage Azure infrastructure as code, reducing manual steps by 80% and enabling version-controlled, repeatable deployments.
- Configured Azure IaaS environments including virtual networks, NSGs, load balancers, and custom script extensions; deployed PaaS resources including App Services and Azure Functions.
- Monitored and optimized cloud costs using Azure Monitor and CloudWatch, maintaining system performance visibility and responding to alerts within defined SLAs.
- Maintained ServiceNow ticketing, resolving 95% of Tier 1 and Tier 2 incidents within SLA, and managed DNS, DHCP, VPN, and firewall troubleshooting across distributed environments.

Vodafone

Remote

Cloud Engineer Intern

June 2022 – December 2022

- Provisioned AWS infrastructure including EC2, VPC, IAM, S3, and EKS using Terraform following IaC and least-privilege security practices.
- Built multi-stage CI/CD pipelines with Jenkins and Azure DevOps, integrating SonarQube for SAST and quality gates across deployment workflows.
- Containerized microservices with Docker and deployed to Kubernetes clusters using Helm, managing namespaces, RBAC, and resource quotas.
- Implemented Prometheus and Grafana dashboards for real-time monitoring, SLI/SLO alerting, and capacity planning across infrastructure environments.

PROJECTS

CI/CD Pipeline

August 2025

Azure DevOps, Jenkins, SonarQube, Docker, GitHub

- Built end-to-end YAML-based CI/CD pipeline automating code pulls, quality scans, Docker image builds, and deployments, reducing manual release steps by 80%.

Go Web App

September 2025

Go, Docker, Kubernetes, Helm, GitHub Actions, AWS (EKS)

- Deployed Go HTTP service to AWS EKS using Helm and multi-stage Docker with HPA, liveness probes, and namespaced RBAC, reducing downtime by 30%.

Terraform AWS Infrastructure

July 2025

Terraform, AWS (EC2, VPC, EKS, S3, Security Groups)

- Provisioned modular AWS infrastructure as code with remote state (S3 and DynamoDB), drift detection, and least-privilege security groups, reducing vulnerabilities by 40%.

SKILLS

Cloud and Azure: Azure (Entra ID, Intune, PIM, Conditional Access, M365, Zero Trust, AD Connect, ARM Templates, Azure Monitor, App Services, Azure Functions), AWS (EC2, VPC, IAM, S3, EKS, CloudWatch)

DevOps and CI/CD: Azure DevOps, Jenkins, GitHub Actions, SonarQube, Docker, Kubernetes, Helm, Terraform, Ansible, Puppet

Systems and Identity: Active Directory, Windows Server, Linux (Ubuntu, CentOS), SCCM, Intune Autopilot, Jamf, ServiceNow, Group Policy, Hybrid Identity

Scripting and Dev: Python, Bash, PowerShell, Go, YAML, JSON

Monitoring and Networking: Prometheus, Grafana, CloudWatch, Azure Monitor, TCP/IP, DNS, DHCP, VPN, Firewall Rules

Multilingual: Arabic, English, French
