EXPERIENCE

Systems Administrator / Systems Engineer

Mar 2023 – Present

Guidepost Montessori

Remote

- Administered Microsoft 365 tenants including Exchange Online, SharePoint, Teams, and OneDrive for 300+ users across multiple school locations
- Deployed Azure Entra ID Conditional Access, MFA, Identity Protection, and PIM to enforce Zero Trust access for remote workforce
- Managed Intune MDM for device enrollment, compliance policies, and app deployment across Windows, macOS, and iOS endpoints
- Automated onboarding and offboarding using PowerShell and Azure CLI, reducing provisioning time by 60 percent
- Administered Active Directory, GPOs, OU structure, group-based licensing, and hybrid identity sync via Azure AD Connect
- Maintained ServiceNow ticketing, resolving 95 percent of Tier 1 and Tier 2 incidents within SLA; handled DNS, DHCP, VPN, and firewall troubleshooting
- Managed SCCM and Intune Autopilot for OS imaging, hardware provisioning, and asset lifecycle across 150+ endpoints

Cloud Engineer Intern

Jun 2022 – Dec 2022

Vodafone

Remote

- Provisioned AWS infrastructure (EC2, VPC, IAM, S3, EKS) using Terraform following IaC and least-privilege security practices
- Built multi-stage CI/CD pipelines with Jenkins and Azure DevOps, integrating SonarQube for SAST and quality gates
- Containerized microservices with Docker and deployed to Kubernetes clusters using Helm; managed namespaces, RBAC, and resource quotas
- Implemented Prometheus and Grafana dashboards for real-time monitoring, SLI/SLO alerting, and capacity planning
- Automated provisioning with Python and Bash scripts; authored architecture docs, runbooks, and incident postmortems

PROJECTS

Go Web App on Kubernetes / EKS / Helm

- Cloud-native Go service containerized with Docker, deployed to AWS EKS via Helm with HPA, liveness probes, and namespaced RBAC

CI/CD Pipeline (Azure DevOps / Jenkins / SonarQube)

- Multi-stage pipeline automating build, SAST scan, Docker image push, and Kubernetes deployment with rollback triggers and Slack alerts

Terraform AWS Infrastructure (EC2 / VPC / EKS / S3)

- Modular Terraform configs provisioning VPC, subnets, SGs, EC2, S3, and EKS with remote state (S3 + DynamoDB) and drift detection

Azure Identity and DevOps Project (Entra ID / Azure AD)

- Configured Entra ID with Conditional Access, PIM, RBAC, and Zero Trust; automated user lifecycle via Azure CLI and PowerShell

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, IAM, S3, EKS, CloudWatch), Azure (Entra ID, Intune, PIM, Conditional Access, M365, Zero Trust, AD Connect)

DevOps and CI/CD: Jenkins, Azure DevOps, GitHub Actions, SonarQube, Docker, Kubernetes, Helm, Terraform, Ansible, Puppet

Scripting and Dev: Python, Bash, PowerShell, Go

IT and SysAdmin: Active Directory, Microsoft 365 Admin, ServiceNow, SCCM, Intune Autopilot, Windows Server, Linux (CentOS, Ubuntu)

Monitoring: Prometheus, Grafana, CloudWatch, Azure Monitor

Networking: TCP/IP, DNS, DHCP, VPN, Firewall rules, VPC networking

Languages: English (fluent), Arabic (native), French (proficient)

EDUCATION AND CERTIFICATIONS

B.S. Computer Science, Cloud Computing Concentration — University of Arizona | In Progress | GPA 3.4

A.A.S. Computer Science — Edmonds College | Completed

AWS Certified Cloud Practitioner (AWS CCP)

Microsoft Certified: Azure Fundamentals (AZ-900)
